

## Flat file export

```
<TimestoneExport>
  <Export category="category" {company="company"} {product="product-name"} {comment="comment"} folder="root-folder" >
    <Images size = "WxH" {format="jpeg|tiff|png|bmp|pic|cmyk"} {bits="24|8|greyscale"} {reference="number|id"} {folder="images-folder"}/>
    <TextFile {delimiter="comma|tab|character"} {quoted="no|0|yes|1"} filename="text-folder&filename|text-filename">
      <Add field="image-filename|image-folder|id|barcode|firstname|lastname|name|folder|group|@fieldname"/>
      ...
    </TextFile>
  </Export>
</TimestoneExport>
```

## PSPA-type (yearbook) export

```
<TimestoneExport>
  <Export-PSPA category="category" {company="company"} {comment="comment"} folder="root-folder" >
    <Images size="WxH" {size-large="WxH"} dpi="dpi" {dpi-large="dpi"} {format=" jpeg|tiff|png|bmp|pic|cmyk} {bits="24|8|greyscale"}/>
    {<ExtraFields>
      <Add field="image-filename|image-folder|id|barcode|firstname|lastname|name|homeroom|period|teacher|group|schoolname|@fieldname" name="name"/>
      ...
    </ExtraFields>}
  </Export-PSPA>
</TimestoneExport>
```

### Legend:

- Optional elements/attributes are surrounded by {curly brackets}.
- Default values for optional attributes are underlined.
- Placeholders are indicated in *italics* (replace with actual value).
- Choice of values are delimited by upright | bars (pick one).

### Notes:

- You can include more than one <Export>...</Export> or <Export-PSPA>...</Export-PSPA> within a single <TimestoneExport>...</TimestoneExport>.
- *category* will create an actual list item in the applications and the export will appear under that. If the export is to be shared, it is recommended that there be an agreement between all on what these category names should be so that the list does not grow overly large and meaningless.
